

The Standard in enterprise Apple management

Maximize user productivity with powerful workflows for Mac, iPad, iPhone and AppleTV.

As Apple device adoption continues to grow in organizations around the globe, the need for an enterprise Apple management solution has never been greater.

Jamf Pro — the standard for Apple management — is an industry-leading solution that delivers the best and most secure end user experience for Mac, iPad, iPhone and AppleTV.

Empower those who choose Apple to use the best of Apple.

Jamf Pro has been 100% focused on Apple management for 17 years and leverages native Apple technology to preserve the Apple experience end users know and love. We keep in lockstep with Apple releases to deliver same-day operating system compatibility — meaning you and your end users get immediate access to new productivity and management features.

“SAP chose Jamf because of its focus on the user experience. Jamf Pro combined with the Apple@SAP service ensures a consistent experience for our Apple users.”

— Martin Lang, Vice President,
IT Services Enterprise Mobility, SAP

User productivity. Maximized.

Deployment

Delight your end users with a fully-customizable onboarding experience. Provision the perfect Mac, iPad, iPhone or Apple TV — all deployed seamlessly with the workflow of your choosing.

Device Management

Use configuration profiles, policies, and scripts to make your Apple devices function exactly as needed. Move beyond simple troubleshooting by automating management with our patented Smart Groups technology: a powerful way to trigger real-time alerts and actions from inventory data.

App Management

Streamline app management with bulk purchasing and deploying. Jamf Pro integrates with Apple Business Manager and Apple School Manager, allowing you to easily assign apps to users or devices ...no Apple ID required. Deploy apps from the App Store, B2B App Store or your own custom in-house apps. When needed, you can also reclaim app licenses to reuse elsewhere.

Inventory

Automatically collect user, hardware, software and security device data or customize inventory specifications. Dynamic Smart Groups keep track of everything for you, including software versions and warranty expiration.

Self Service

Give your users access to a one-stop shop for trusted apps, company resources ... and even shortcuts for troubleshooting tasks like password resets. Jamf Self Service — a fully customizable, on-demand app store that you control — is the best way to empower end users while cutting down on IT support requests.

Security

Secure Apple devices by leveraging native security features. Manage device settings and configurations, restrict malicious software and patch all of your Apple devices without user interaction. For endpoint protection purpose-built for Mac, use Jamf Pro with [Jamf Protect](#).

The best part? **Jamf Pro** works seamlessly with your existing IT services and technologies.

Deep integrations with Microsoft, Google, Cisco and more help you extend the value of your existing tech stack.
